pracovisko, Nitra**

EMPLOYMENT HISTORY

09/2016 - 03/2018

ICO website (personal project) / *Web Developer*

<https://ico.kareemsprojects.site>

A template for an ICO website (Initial Coin Offering) with full back-end functionality.

My experience developing this website:

- Secure login, registration, news feed, profile, and dashboard
- Real-time chat with Node JS and socket.io
- Responsive markup and styling in HTML5, CSS3, and Bootstrap 4
- Front-end programming in Javascript, jQuery, and AJAX
- Based on the CakePHP and Node JS Express frameworks
- PHP security (cross-site scripting, SQL injection, CSRF, industry standard password hashing, SSL)
- Solidity smart contract

03/2018 - 06/2018

Self-employed / *Mobile Game Developer*

<https://play.google.com/store/apps/details?id=com.warbase.android>

nBase is a multiplayer strategy game available on Google Play.

My experience developing this game:

- Object-oriented programming in Unity and C#
- Multiplayer networking
- Real time player to player chat

- Crypto wallet - AES-256 encryption, account generation, balances, transfers
- Player inventory, profile, and friends list
- Back-end development in PHP, Node JS, and MySQL
- Push notifications using Firebase
- Navigation and path finding logic using the A* algorithm
- 3D graphics design in Blender and Substance Painter
- ERC20 token - Solidity/Smart contract programming

06/2018 - 07/2018

Upwork freelancer / *PHP and Javascript Developer*

The job involved bug fixes and introducing new gameplay elements to a browser based Battleships game in PHP and Javascript.
